

A greener and more digital Germany

The twin transformation of sustainable digitalisation fuels productivity, prosperity, and decarbonisation in Germany. Google's investment of approximately 1 billion euros helps drive this progress by expanding its digital infrastructure while conscientiously prioritising environmental, economic, and social aspects throughout the entire supply chain.

Digital infrastructure

People

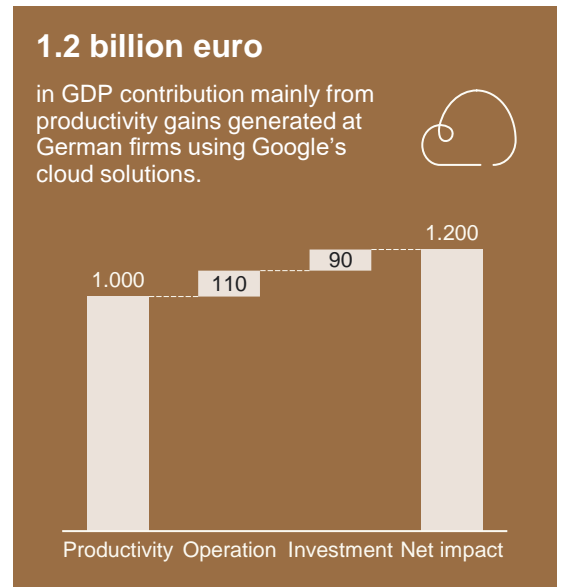

- > **5,200 jobs**
supported at Google, their suppliers and local businesses in 2022.

- > **290 million euro**
in labour income sustaining secure livelihoods of German families and individuals in times of uncertainty.

- > **1.9 million people trained**
improving their digital skills which are essential for reaping the benefits of digitalization.
