

# Accelerating innovation with AI in Switzerland

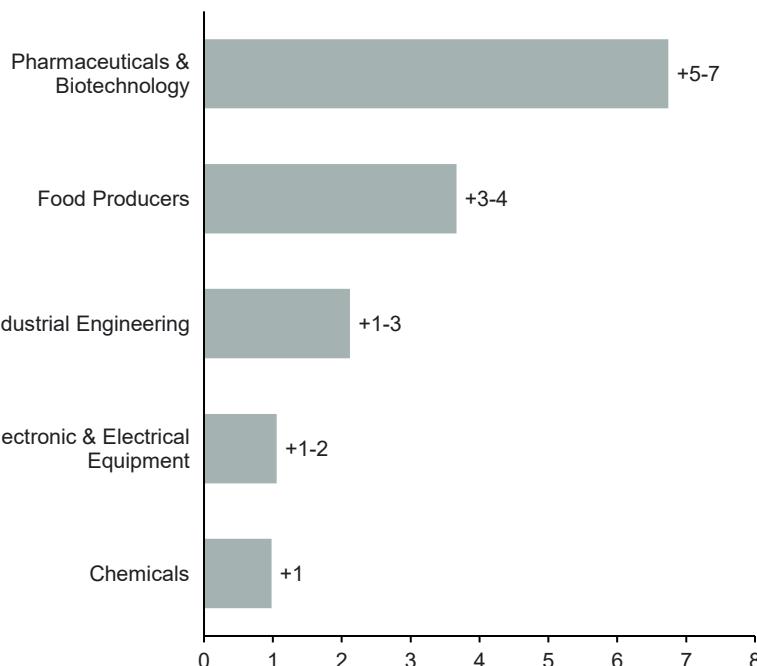

The economic potential

## AI in science can unlock an annual CHF 15 billion economic boost for Switzerland

Switzerland can use AI more for inventions. Inventing more with AI can unlock approximately **CHF 15 billion** in annual economic value. To capitalise on AI innovation, Swiss businesses need robust AI infrastructure and innovative digital businesses to drive the adoption of AI.

### GDP potential in 2034

CHF billion

*CHF 15 billion  
annual  
contribution  
to GDP*

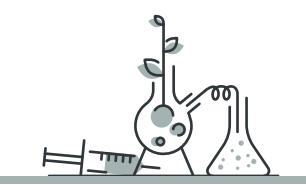

### Inventing with AI

**2X** higher innovation quality with AI

**10-20%** more efficient R&D processes with AI

**2-7X** social return on AI-induced R&D efficiency

### Producing AI

Building AI models, data centres and AI applications in Switzerland is a key element in realising the potential of inventing with AI.

### Commercialising AI

Growing and scaling more innovative digital businesses in Switzerland is an essential enabler of the AI innovation potential.
